2022 CRIME AND SECURITY FORUM

CRIME AND SECURITY IN A POST-PANDEMIC WORLD

ONLINE EVENT, 28 NOVEMBER, 9.30AM - 4.20PM

The onset of the COVID-19 pandemic, along with various geo-political and societal changes, has proven to be a challenging period for managing crime and security issues. Trends such as increased digital transformation and remote working are here to stay, and they bring new dimensions of concern. Increased use of social media and the internet present ever changing threats to crime, public order and security. Technological advancements such as the metaverse development raises new challenges. In the face of major changes in the post-pandemic world, crime control and the maintenance of public safety and security cannot remain static. The forum will discuss what the implications are and what needs to be done in crime and security control.
